

Additives

Groovy

This “Groovy” look was brought to life by mixing CND Additives with Brisa™ Gel to create a bright, tie-dye effect. This is a super easy technique that anyone can do. Create bold statements or try with softened tones for more subtle design.

STEP 1:

- P.R.E.P. the natural nail and apply a CND Clear Tip. Apply a Brisa™ Clear Gel enhancement and finish with the 180 side of the Blizzard™ File. (For details, see our Brisa UV Gel Enhancements Sculpted on a Tip Step-by-Step).

STEP 2:

- Apply two layers of Pure White Brisa Paint over the entire nail.
- Cure each layer for two minutes in the CND UV Lamp.

STEP 3:

- Mix Additives Brisa Gloss and Brisa Pure White Paint in a mixing tray to create the design's colors. Gently stir together using a spatula or an orangewood stick until thoroughly mixed. Use a slow, steady motion to avoid creating bubbles. To maintain the integrity of the enhancement, never mix more than 30% Additives to any gel blend.

• **Bright Yellow**

- 3 parts Brisa Gloss
- 1 part Brisa Paint Pure White
- 1 part Additives Yellow

• **Hot Pink**

- 3 parts Brisa Gloss
- ½ part Brisa Paint Pure White
- 1 part Additives Haute Pink

• **Electric Blue**

- 3 parts Brisa Gloss
- ½ part Brisa Paint Pure White
- 1 part Additives Cerulean Blue

STEP 4:

- Use the Gel Flat Oval Brush with a light touch and apply the Electric Blue gel to the enhancement. Float the gel from side-to-side to create the design. Add small details to the sides of the nail.
- Lock for 10 seconds in the CND UV Lamp.

STEP 5:

- Thoroughly clean the brush. Apply the Hot Pink gel with the same side-to-side floating technique, overlapping a portion of the blue. Add small details to the sides of the nail.
- Lock for 10 seconds in the CND UV Lamp.

STEP 6:

- Thoroughly clean the brush. Finish the color blend with the Bright Yellow gel, overlapping a portion of the pink. Add small details to the sides of the nail.
- Cure the design for two minutes in the CND UV Lamp.

STEP 7:

- Seal with a thin layer of Brisa Gloss and cure for two minutes.
- Remove the sticky, uncured layer with ScrubFresh™ and a lint-free pad to reveal the shine.

PRODUCTS REQUIRED

- CND Clear Tips
- Brisa Sculpting Gel Clear
- Brisa Paint Pure White
- Brisa Gloss
- Brisa Bond
- CND Additives: Yellow Pigment, Haute Pink Pigment Effect, Cerulean Blue Pigment Effect
- CND ProSeries Gel Flat Oval #6 Brush
- CND Files & Buffers
- CND UV Lamp
- ScrubFresh
