

## Kit # 7248 & 7251 08-09 Challenger Stripe Kit

**Notice: Pre fit before Installing!**  
**There should be 1/4" over hang at the end of each panel!**  
**Painted or Altered Parts are Non-Refundable!**  
**Should be installed by professional!**

**Step 1:** Run masking tape down the top edge of the body line as shown in fig.A. (This will allow the stripe to lay on the flat surface above the body line.) Cut the extra paper off a 1/16" from the bottom of the stripe. When installing the stripe butt the bottom edge of the stripe to the top edge of the tape.

Fig. A

**Step 2:** Install the door vinyl first. Center the vinyl evenly around the door handle as shown in fig.B and leave about a 1/16" gap around the rear view mirror as shown in fig.C. (The door vinyl must go on first to set the location of the adjacent vinyl.)

**Step 3:** Install the rear quarter panel vinyl. Align the vinyl 1/8" away from the rear bumper as shown in fig. D. The driver side also needs to be centered evenly around the gas door as shown in fig.E.

**Step 4:** Measure 2-5/16" from the bumper seem forward and make a mark as shown in fig.F. Align the front of the vinyl with this mark and install. Make sure to push the vinyl into the seem. When the vinyl dries out cut the seem with a sharp razor.
